OUTLOOK FOR TRADE BALANCES IS GOOD

Iron Again Appears the Absorbing Interest, Factories Being Unable to Fill Orders-Failures About Half of Year Ago.

NEW YORK, June 23.-R. G. Dun & Co.'s Weekly Review of Trade will say tomor-

The outgo of more gold this week, \$4, 000,000, so far reported, makes it clear that Europe is in need. The French ministerial Europe is in need. The French ministerial crisis has been grave and prolonged, the collapse of German speculation in industrial stock threatens some trouble, but perhaps the South American uncertainty causes most disturbance. Whatever the cause, Europe needs money and cannot claim its own from the west this year, but must borrow. Exchange and trade balances show that the conservations. show that this country is not called upon to pay, but the money is worth more to lenders abroad than it is here. Home finances are most satisfactory. Revenus falls behind expenditures for the fiscal year less than \$100,000,000, and but for \$230,000,000 war expenses, the revenue exclusive of that from the war taxes exceeds ordinary

Trade balances, in spite of exports from

New York, 19 per cent less than last year's, and imports 26 per cent greater, still prom-ise a large excess of exports for June. Nor is there any substance in the idea that large foreign sales of securities are moving gold. The best evidence attainable shows that in January and February about \$8,250,000 worth of securities came to this side, and since February, not more than \$4,000,000 in ex-cess of shipments. In character, transac-tions have been of the trading and not of the investment sort. Stocks here have weak-ened, but almost exclusively in the industrials, which foreigners do not touch, these declining \$2.08 per share on the average this week, while railroad stocks have averaged a decline of only 29 cents per share. Earnings for the first half of June are better than for any previous month this year 10 per cent larger than last year, and 11. 10 per cent larger than last year, and 11.3 per cent larger than in 1892 the granger roads gaining most largely over last year in spite of the reduced movement of grain. In the great staples, there is a turn for the better. Exports of wheat, flour included, for the week, have been 3.643,672 bushels, against 3.800,660 last year, and in three weeks, 6,504,262, against 11,005,798 last year.

Corn exports also continue large, 2,627,366 ushels, against 2,574,723 last year. A sharp fall in cotton also encourages exports. These are facts which preceded orders for go'd exports this week, and do not result from them, but show the prospect of a larger outgo of merchandise in coming months. Wheat receipts at the west, 15,600,688 bushels for the last three weeks, agains 3,463,779 last year, and 4,540,549 bushels in the same week in 1897, show an extraor dinary movement from the farms for the season, indicating no suspicion there of shortage. The fall of 2 cents in wheat and in cotton from 6.31 to 6.12 cents, indicates that speculation, based on the hope of short

rop, is decreasing.
Textiles are much behind in prices, though woolens are steadily rising and are 5 pe-cent higher than at their lowest in March The goods are in much stronger demand and wool has advanced from 18.01 to 18.7 cents for domestic, taking the average of 100 quotations by Coates brothers, though the buying is largely sepeculative. In cot ton goods the advance has been small, and though business is excellent, the demand fairly matches the supply.

The great gain in volume of business might seem of questionable safety, were it not greater in iron production, resulting from an actual excess of demand over supply and not from speculation. Bars ar Kansans: "You come out and see me because you think I am a middling good American. I try to treat men on their merits—justice to all and injustice to none." for two American liners, to be built by th Cramps, has gone to Chicago, eastern work being too full. Less than the average effect of approach ing midsummer influences is discernible i current trade reports. Prices too show a ticularly in view of recent steady advances. This is notably manifest, of course, in the iron and steel industry, where the tendency of values is still upward, though the re-vances reported are not uniform at all markets, pointing to individual instances of business done at best possible prices. Where prompt delivery can be guaranteed, fancy uotations are in many cases obtainable nd testimony to the scarcity of supplies

is universal. An unprecedented weekly output of coke summer shutdown in iron and its allied industries will be ignored, and claims from Pittsburg of the placing of record-breaking centracts for steel ralls for export to Rus sia, not, however, for immediate delivery Predictions of \$20 for Bessemer are wel though it would not stop. In fact, all of within sight of realization and warnings of Kansas along the route of the Santa Fe overdoing the situation are more numerous. Was out today to honor Roosevelt, the Rough Hopes of improvement in the woolen goods. industry have materialized in an active de mand at leading markets for the manu factured product, and, simultaneously, from small stocks of lightweight goods in deal

ers' hands. Wool is more active and firm, in sym pathy therewith, and sales are larger, though mostly on speculative account. A is heavy sales of domestic wools to buyers, but whether this wool will go abroad depends upon next week's London sales. Improved crop reports are responsible chiefly or lower quotations of products declining in price this week. Wheat has been af-fected by glowing reports from spring wheat but more especially by continued enormous deliveries of old crep supplies. At

CRAPE NUTS

Solve the Problem,

The United States government has been attempting to instruct the people regard-

ing the purchase of food that would give the best advantage to the system with the least expenditure of money. A report has been made by Prof. Atwater, the famous chemist, and the subject is of great interest. This is an age of specialists, and the portance. Persons who do not care to go the American Distilling company, with a into all the details and statistics, can secure practical results by using Grape-Nuts, as the market was concerned, other than cure practical results by using Grape-Nuts, the breakfast food, which is probably the most scientifically made food in the market. It is made for a purpose and was originated by a food expert of unquestioned standing. The elemental principles contained Grape-Nuts are selected for their value in rebuilding the brain and nerve centers in the human body. The subject is worth any

brain worker's attention.

the decline, however, good buying on ex-port account has developed. Cotton crop prospects have continued to improve and the raw product is lower on the week, with a shading claimed also in print cloths, al-though cotton cloths as a whole are in an

exceptionally strong position.

Raw sugar is lower on unanimous good crop prospects the world over, but sugar is in heavy domestic demand and firm. In industrial lines generally there is little more than the usual friction as to wages. the most serious disturbance being the Colorado smelling works. The usual summer shutdown of glass factories is now complete shutdown of glass factories is now complete. Indiroads point to an unusual traffic doing and reports are continually favorable, particularly in the northwest, but passenger and freight cuts are increasing. Lumber retains all of its early activity and strength. Wheat, including flour, shipments for the week aggregate 3,576,718 bushels, against 2,799,471 last week, 3,799,480 in the corresponding week of 1808, 2,156,248 in 1897, 2,837,631 in 1896 and 1,946,102 in 1895. BRADSTREET'S FINANCIAL REVIEW Irregularity Appears as the Predominent Feature of Speculation. NEW YORK, June 23 .- Bradstreet's Finan-

ial Review tomorrow will say: Irregularity, with some exhibitions of cositive weakness, has been the feature of peculation for the last six days. The stock narket has been professional to an increas-ng extent, and there was evidence that powerful influence have been active on the bear side. Liquidation in certain specialties has been visible, though in some stocks, which were prominent in this connection, the selling seemed to be the unleading of arge blocks by people identified with the canipulation

ertain parts of the list, as, for instance, the Vanderbilt stocks, which might sug-gest an accumulating process and other groups, notably the Anthracite coalers were ments. The short interest, though naturally much larger than it was some weeks ago, betrays a certain amount of nervousness and a decided readiness to cover at cessions which prevented the declines from assuming a steady or decided character, and in many cases, limited them to small dimensions. It would seem that the public and street are inclined to suspend folds ment as to whether prices are too high or not, until a more definite conclusion as to the grain crop results can be drawn. Discussion of the crop outlook was, how-ever, less prevalent than it was a week ago, and among the chief active bearish factors have been the probability of larger gold exports, which, as described in another column, have been increased by the strength of both the Berlin and London money mar kets, did not escape notice, however, an the New York money market has been quiet and interest rates continued compara-

caused by the extremely large interest and lividend disbursements falling due The uncertainty of the European political outlook and the somewhat critical state of affairs in South Africa with its unfavorable bearing on the London market, was not without some effect, and the foreign reports were, in the main, sellers of stocks here. It was also noted that the indus-trials furnished the weakest part of the list, the break in the tobacco stocks being a feature, while the proposed amalgama-tion of the several spirits corporations in as the market was conceived, other than a sharp decline in American Spirits manufacturing. The traction stocks and specialties were quiet and weak at times, though strength was extended to them, and the action of a short interest seemed to result in covering and railfied. Bonds have been active and the investment demand al-ready noticed continued. In the early part of the week new high records were made in a number of prime issues, but later on there were some fractional concessions.

PLOTTING AGAINST CABINET

Some Who Helped Overthrow the Old Are Dissatisfied with the New.

ARMY OFFICERS TO BE DISCIPLINED

To Be Transferred from Present Commands-Report Parliament is to Be Prorogued to Facilitate Settlement of Dreyfus Case.

PARIS, June 23 .- The new cabinet minisers took possession of their offices today The prefect of police, M. Blanc, had a long interview with the premier, M. Waldeck-Rosseau, during the day, and it is asserted be handed the latter his resignation. The progressive republicans have held a meeting under the presidency of M. Meline. Considerable diversity of opinion was developed. One faction decided to oppose the new cabinet, owing to the presence of M. Millerand in the ministry. The socialist deputies are also at variance regarding the entry of General de Gallifet into the cabinet and a portion of that party has decided to found a new group, to be entitled "revolutionary socialists."

The first cabinet council of the new ministry was held at the Elysce palace tonight, President Loubet presiding. At this meet ing the general lines of a declaration to be made by the government Monday were dedrafted at a council to be held Sunday.

Disciplining Army Officers.

At the instance of General de Gallifet minister of war, the council decided upon the transfer of a number of superior officer of the army for "indulging in manifestations unbecoming soldiers."

The radical socialists have decided to sup port the government, provided it defends the republic. When this decision was made known M. Charles Camille Pelletan, deputy for Aix (circonscription), and a few others withdrew from the group.

The Temps says: "The composition of the cabinet may appear extraordinary in the face of the material tranquillity existing, but, tember 1, last, when two factions of the unhappily, moral tranquility does not prevail in the same degree. The cabinet will shortly prorogue Parliament and take upon itself alone the solution of the Dreyfus affair. Within the limits of its power the government might do some useful work by defending the army against the imprudent language of its representatives and against the attacks of its enemies by causing respect for the magistrates and their decisions and by protecting the Dreyfus court-martial against the menaces of some and the flatter ies of others."

Sensational Will Case. SIOUX FALLS, S. D., June 23 .- (Special

Telegram.)-It has just leaked out that papers have been filed here which will result in one of the most sensational cases ever tried in Sioux Falls. The case involves the property of Isaac Low, a wealthy resident. who died here a few days ago, whose body was taken yesterday to Waterloo, la., fo burial. The heirs are a widow, four children, sons, Jacob and Charles, residents of Sloux Falls, one at Watertown, Ia., and another resident in Illinois. Deceased failed to execute a will, but a short time prior to death expressed the wish that C. T. Lorimer of this city be appointed adminis trator of his estate. This was apparently satisfactory to all the heirs. Low's son Charles filed a petition through an attorney for his own appointment as adminis trator. The other heirs will bitterly fight against this and sensational facts will b divulged.

Sheep Shearing in Progress RAPID CITY, S. D., June 23 .- (Special.) The sheep shearing season has commenced in those parts of the Hills where speci raising is carried on. It is rather late owing to the difficulty in getting shearers as soon as they are needed. The clip will be unusually large this year on account of the cold winter. The sheep ranges are it a fine condition and large numbers of sheep have already been brought in this season and have commenced to fatten. The prospects are that this will be the best year for lambs that the Hills has seen for some time.
